Chatbot Implementation Guide

Intent Mapping	Map each FAQ to a chatbot intent. Use the 'Tags' field to define entity synonyms. For example, 'fee', 'fees', 'payment', 'charges' should all route to the Fee FAQ intents.
Fallback Handling	If confidence score < 70%, escalate to a human agent via WhatsApp Business or email. Always log unanswered queries for monthly FAQ updates.
Conversation Starters	Train the bot to recognise openers: 'Hi', 'Hello', 'I have a question', 'Help'. Respond with a category menu (Admission / Fee / Transport / Exam / Other).
Language Support	Deploy a multilingual model (English + Hindi + Marathi) using language detection. ABCInternational's parent community is multilingual.
Personalisation	Integrate with the Parent Portal API to personalise responses: 'Your child's bus (Route 7) ETA is 3:45 PM.' Requires OTP-based authentication.
Regular Updates	Schedule a monthly FAQ review with each department head. Update the dataset before key dates: Admission open (Oct), Fee due (Jul/Oct/Jan), Exam season (Jan–Mar).
Channel Deployment	Recommended channels: Website chatbot, WhatsApp Business (wa.me/91XXXXXXXXXX), Parent Portal in-app chat. Use the same dataset across channels for consistency.
Analytics	Track: Top 10 queries by volume, unresolved query %, average resolution time, user satisfaction rating. Use Google Dialogflow or Rasa analytics dashboards.
